

Anqi Fu

Professor

✉ anqif@alumni.stanford.edu 📍 New York, NY

Education

Stanford University , Electrical Engineering	Stanford, CA
- Dissertation titled "Convex Optimization Methods for Adaptive Radiation Therapy". - Committee members were Stephen Boyd (Ph.D. Adviser), Lei Xing, Balasubramanian Narasimhan, and John Duchi.	2016 – 2021
Stanford University , Statistics	Stanford, CA
	2012 – 2014
Stanford Graduate School of Business , Business Research (Economic Analysis and Policy)	Stanford, CA
	2009 – 2012
University of Maryland, College Park , Electrical Engineering	College Park, MD
	2005 – 2009
University of Maryland, College Park , Economics	College Park, MD
	2005 – 2009

Experience

NYU Grossman School of Medicine, Department of Radiation Oncology , Research Assistant Professor	New York, NY
	2026 – present
	1 year
Memorial Sloan-Kettering, Department of Medical Physics , Assistant Attending (Faculty)	New York, NY
	2022 – 2026
	4 years
Memorial Sloan-Kettering, Department of Medical Physics , Postdoctoral Research Scholar	New York, NY
Advised by Dr. Masoud Zarepisheh and Dr. Joseph O. Deasy.	2021 – 2022
	1 year
Stanford School of Medicine, Department of Radiation Oncology , Life Science Research Professional	Stanford, CA
Member of the Xing Lab, led by Prof. Lei Xing (Chair, Division of Medical Physics).	2016 – 2016
	1 year
H2O.ai , Machine Learning Scientist	Mountain View, CA
	2014 – 2016
	2 years
Naval Research Laboratory, Materials Science and Technology Division , Engineering Technician	Washington, DC
	2008 – 2008
	1 year

Awards

John M. Chambers Statistical Software Award, Honorable Mention	2018
American Statistical Association	

Stanford Graduate Fellowship Stanford University	2016
National Science Foundation (NSF) Graduate Research Fellowship National Science Foundation	2009
Maryland Distinguished Scholarship Maryland Higher Education Commission	2005
Intel Science Talent Search Semifinalist Intel	2005
Siemens Westinghouse Science Competition Semifinalist Siemens Westinghouse	2004

Languages

English
Native speaker

Mandarin
Novice

Interests

Cancer Therapy

Optimization

Machine Learning

Projects

A2DR https://github.com/cvxgrp/a2dr Python solver for distributed optimization using Anderson accelerated Douglas-Rachford splitting.	2020
CVXR https://cvxr.rbind.io R package for disciplined convex modeling and optimization.	2020
AdaRad https://github.com/anqif/adarad Python library for adaptive radiation therapy with nonlinear dynamics.	2022
ConRad https://github.com/bungun/conrad Python library for radiation treatment planning with dose-volume constraints.	2019
Some Project Google Play Store , App Store - Developed a web application with React and Django. - Implemented a RESTful API	Remote Sept 2021
